Notes:

- Attach a separate description and printed map for each petroleum product pipeline system, including pipeline diameters, all points of origin, location of terminals, points of interconnection with pipeline systems operated by others, balancing and emergency storage tanks, and any other relevant information. Also include submittal of electronic information for each pipeline system in a geographic information system (GIS) format.
- Usable Storage Tank Capacity is total storage volume minus that volume which cannot be used for normal applications.
- Receipts to Pipeline include product shipments from other terminals into or via refinery storage facilities.
